

Evaluation of Childrens Language Development at Practice Liliput

Dear parents,

You are interested in an evaluation of your child's language development. Please send us the attached questionnaire and we will call you to fix a date.

If necessary, please ask somebody for help filling out the attached questionnaire. It is important for us to have the questionnaire answered, so we can better understand your child and its development.

Playing Sequence

During the first 45 minutes, the speech therapist will play and talk with your child. Meanwhile you can sit on a chair nearby in the same room. Thereby, your child can initiate contact with you when needed, but can keep playing alone with the speech therapist. A second speech therapist will be sitting in the room and will be writing down her observations.

Short pause

After the playing sequence, the speech therapists will leave the room, to have a short talk about their observations for about 5 minutes. You will be able to stay in the room with your child.

Discussion with parents

For about 40 minutes the speech therapists will discuss with you their observations and will then ask some more questions about the early development of your child. In this time your child can play alone or listen to the conversation. We will then discuss with you the planned procedure. If you cannot talk with us in English or German we kindly ask you to come accompanied with a translator.

Questions

If you have any questions, do not hesitate to contact us. If there are still questions after the evaluation you can call us anytime.

We are looking forward to getting to know you and your child.

Best regards

Team Liliput
